

Kiwi Coatings

kiwicoatingsaz.com/ · Coolidge, AZ

The overall score is a weighted average across eight categories (Google Business Profile, technical foundation, service/location architecture, local content, reviews, citations, competitive visibility, and conversion measurement). Categories with unavailable data were excluded from their denominator rather than scored as zero, which lowers the confidence score (currently 48%) instead of penalizing the business unfairly.

Data confidence: **48%** — lower confidence means some data sources weren't available, not that the business scored poorly there.
